#### NOTICE AND AGENDA Special Board Meeting Sanitary District No. 5 of Marin County Wednesday, April 15, 2020

#### 10:00 A.M. SPECIAL BOARD MEETING

#### **CORONAVIRUS (COVID-19) ADVISORY NOTICE**

On March 16, 2020, the Marin County Public Health Officer issued a legal order directing residents to shelter at home for three weeks beginning March 17, and that order was superseded on March 31, 2020, by an updated order that further directed residents to shelter at home until May 3, 2020. The newly issued order continues to limit activity, travel and business functions to only the most essential needs.

Additional information is available at https://coronavirus.marinhhs.org

Consistent with Executive Orders No. N-25-20 and No. N-29-20 from the Executive Department of the State of California, the Board Meeting will not be physically open to the public and all Board Members and Staff will be teleconferencing into the meeting.

#### **How to Submit Public Comments:**

Comments submitted prior to the commencement of the meeting will be presented to the District's Special Board and included in the public record for the meeting.

Public Comments are to be submitted via email to rdohrmann@sani5.org.

In addition, members of the public who are calling in, will have the opportunity to provide public comments by following the steps below:

#### **How to Participate in the Board Meeting:**

#### **ROLL CALL**

**PUBLIC COMMENTS:** The public is invited to address the Board on items that do not appear on the agenda and that are within the subject matter jurisdiction of the Board. The Brown Act does not allow the Board to take action on any public comment. Please limit public comments to no more than three minutes.

#### MAIN PLANT CAPITAL IMPROVEMENT PROJECTS

| Main Plant Project Name                 | DESCRIPTION   |
|---|---|
| Odor Control Upgrade                    | This Project will evaluate current odor control system and vulnerabilities and also provide for options to replace, add to or enhance the current system.   |
| Dry Weather Influent Pump               | These funds will be used to purchase one new dry weather influent pump. These were not part of the MPR project.   |
| Wet Weather Influent Pump               | These funds will be used to purchase one new Wet Weather Influent Pump. These were not part of the MPR project.   |
| Headworks Grinder Replacement           | These funds will be used to replace grinders that have a usefule life of 5-10 years. Grinders were not replaced during MPR Project only the cutting cartridges were replaced.   |
| Truck Purchase                          | These funds will be used to replace the Utility truck from the current fleet of vehicles.   |
| Emergency Outfall Rehabilitation        | This project will consist of rehabilitating the abandoned effluent outfall pipe in order to have it available for use during emergency situations. Emergency Preparedeness  |
| Waste Gas Burner Rehabilation           | Tiger mag flow meters with Krohne flow meters. These were not part of the MPR project. This project will evaluate current waste gas burner system and will be enhanced or replaced, dependent on evaluation report.                   |
| Aeration Basin Diffuser Upgrade         | This project consists of replacing the current diffusers in the off line aeration basin with new style diaphram type diffusers like the online aeration basin this did not get upgraded during the MPR project                        |
| Underground Pipe & Valve Rehabilitation | These funds will be used for the replacement of non-working valves and rusted-out pipes in the shipping/receiving area, as well as next to the secondary clarifiers, as identified during the MPR Project.                            |
| Maint Shop/Replacement/Ops Control Room | This project will consist of replacing a 35+ y.o. corregated metal maintenance shop, not rehabbed during the MPR Project. Consideration will be given to making the building 2 stories for a a new operator/maintenance control room. |
| Sludge Box Replacement                  | Replacement of Biosolids container, used for hauling bio-solids to Redwood landfill.  |
| Emergency Generator Replacement         | This project will consist of replacing the Main Plant Emergency Generator. These were not part of the MPR project. Generator is currently serviceable but planning and budgeting needs to be in line for 2024/25.                     |
| Outfall Difuser Upgrades                | Current condition of outfall is serviceable. Outfall is inspected every 5 years and must budget a reasonable amount for repairs or upgrades, as determined by future reports.   |
| Undesignated Capital Projects           | These funds will be used for unforseen projects, which may come up after the MPR project is complete.   |
| MPR Bond                                | Main Plant Rehabilitation Completed in 2014 - Bond Payments to show true annual CIP projections.  |

### BELVEDERE ZONE PUMPS & LINES CAPITAL IMPROVEMENT PROJECTS

| Belvedere Zone Pumps & Line Project Name     | DESCRIPTION   |
|--|---|
| Sewer Line Rehabilitation Program            | These funds will be used for the ongoing Board approved 10-year sewer rehabilitation program. 7,644 lf of pipe remain to be rehabbed/replaced from the Harris Reports.  |
| Program                                      | The District has 24 pump stations with 2-3 pumps in each station. The life expectancy for these pumps are 7-10 years. Therefore, the District has a program to replace pumps over a period of time instead of replacing them all at once.   |
| Pump Station Control Panel Replacement       | Within the Belvedere Zone, there are many pump stations with single-phase power with capacitors installed in the panel to generate three-phase power. The District is replacing the generators to new standardized control panels. To date - station #15, 14,13,12,5 & 3 control panels have been replaced. Need to purchase panels for #2   |
| Pump Station Generator Replacement           | Standby generators at the Belvedere pump stations were installed in the early 1980. Station #3 Generator recently replaced need to replace station #1 & #2 Generators   |
| Pump Station Comm. Upgrade Project           | These funds will be used to provide alarming and communication back to the Main Plant SCADA system, The new communication equipment will be standardized  |
| Cove Rd. Force Main Replacement              | These fund will be used to replace 2107 If of 10' force main. The force main has blown out on two occasions prior to 2005. According to previous Staff, it was difficult to find good pipe material to connect to, when making the repair. Recently the forcemain was compromised as a result of a 3rd party. Same issue was encountered when repairing. The current pipe size also lacks capacity during major wet weather events. |
| Lagoon Rd. Power Feed Improvement<br>Project | Lagoon Rd. has 3 pump stations which pump sewage to one another. These station have no back-up power. These funds would be available to purchase a generator and install power conduits to connect all three stations in order to provide immediate back up power to these sites and it also reduce staff overtime.  Emergency prepardeness   |
| Flow Meter Installation Project              | This project will consist of installing flow meters at certain corresponding pump stations to record flows from each site. This will assist with flow monitoring and assist District's continued effort to reduce I&I.  |
| San Rafael Ave. Diverter Project             | This project will consist of evaluating current flows and collection system capacity at the intersection of Westshore and San Rafael Ave., feeding into TPS #3.   |
| Manhole Rehabiliation Project                | This Project will consist of rehabilitating or replacing man holes in the Tiburon area that have have defeciencies due to hydrogen sulfide detoriation.   |
| CCTV Sewer System                            | This project will consist of retelivziing the belvedere collection system in order to get an updated condition of the sewer system and to assist in establishing an updated CIP program for sewer rehabilitation projects.  |
| Undesignated Capital Projects                | These monies are for unforeseen problems within the collection system.  |

#### TIBURON CAPITAL IMPROVEMENT PROGRAM

| Tiburon Project Description             | 2019/2020 | 2020/2021 | 2021/2022 | 2022/2023 | 2023/2024 | 2024/2025 | 2025/2026 | 2026/2027 | 2027/2028 | 2028/2029 | TOTAL     |

# TIBURON ZONE PUMPS & LINES CAPITAL IMPROVEMENT PROJECTS

| Tiburon Zone Pumps & Line Project Name             | DESCRIPTION   |
|--|---|
| Sewer Line Rehabilitation Program                  | These fund will be used for the ongoing Board approved 10 year sewer rehabilitation program. 10,137 lf of pipe remain to be rehabbed/replaced from the Harris Report.   |
| Pump Station Pump and Valve Replacement<br>Program | The District has 24 pump stations with 2-3 pumps in each station. The life expectancy for these pumps are 7-10 years. Therefore the District has a program to replace pumps over a period of time instead of replacing them all at once.  |
| Pump Station Generator Replacement                 | The District has standby generators located at many of the Pump Stations. Some generators were installed between 1980 - 1983. These generators (in most cases) are located along the waterfront. The salt air has wreaked havoc on some of these generators; All have been replaced as of 7/1/2018  |
| Pump Station Control Panel - Upgrade               | These funds will be used for replacement of control panels at the District Pump Stations. The control panels are of various ages, of which most are extremely old/obsolete.  / With the exception of stations #6 & #7, which are furthest away from marine conditions, all SD5 tiburon control panels have been replaced as of 7/1/2018   |
| Man Hole Rehabilitation                            | This project will consist of rehabilitating or replacing man holes in the Tiburon area that have have defeciencies due to hydrogen sulfide detoriation.   |
| CCTV Sewer System New PACP Data                    | This project will consist of retelevising the entire collection system in order to provide updated information regarding the condition of the system and to assist in establishing a new CIP project regarding sewer line rehabilitation  |
| Station No.5 Replacement                           | This is a phased project of upgrading the main pump station in the Tiburon Zone:  Phase I has been completed, which replaced the motor control center/electrical controls and the installation of a diesel powered standby emergency generator.   |
|  | Phase II has also been completed, which converted the dry-pit configuration into a wet-pit configuration, thus eliminating the need for dry-pit centrifugal pumps (which are now obsololete). The old pumps were replaced with 2 new submersible flygt pumps for standarization with District requirements. This also eliminated a confined-space entry situation.  Phase III consists of rehabilitating the force main servicing this site. It is the last phase of this project anticipated around 2024 |
| Flow Meter Installation Project                    | This project will consist of installing flow meters at certain corresponding pump stations to record flows from each site. This will assist with flow monitoring and assist in the District's continued effort to reduce I&I.   |
| Vactor Truck Purchase                              | This purchase will allow the District to clean sewer lines more frequently at typical "hot spot" areas (e.g., downtown area, Pt. Tiburon, Tiburon Blvd., Penninsula, San Rafae Ave., etc.). SD5 will also to perform more frequent cleaning at the Main Plant grit chamber, headworks and split box, as well as pump and transport solids from Paradise Cove back to the Main Plant. Recyle Water will be used for sewer cleaning activities  |
| Force Main Rehabilation Project                    | This project will consist of rehabilitating several force mains in the Tiburon Zone. Station #2, #3, #6 & #7  |
| Pump Station Communications Project                | Phase I completed. Master radio at the Main Plant has been upgraded, as well as the radio at Station #5. As new control panels come on-line in the Tiburon Zone, funds will be needed to bring the remaining 8 sites into the Main Plant communication network.   |
| Undesignated Capital Projects                      | These funds are for unforeseen problems within the collection system.   |

### PARADISE COVE PLANT CAPITAL IMPROVEMENT PROGRAM

| Paradise Cove Project Description     | 2019/2020 | 2020/2021 | 2021/2022 | 2022/2023 | 2023/2024 | 2024/2025 | 2025/2026 | 2026/2027 | 2027/2028 | 2028/2029 | TOTAL     |

### PARADISE COVE ZONE PUMPS & LINES CAPITAL IMPROVEMENT PROJECTS

| Paradise Cove Project Name             | DESCRIPTION  |
|--|--|
| Influent Pump Replacement Program      | Currently there are 6 grinder-style pumps in service at ParadiseCove. Each has a usefule life of 7-10 years. This program is established to replace pumps as needed; not all at once.  |
| Package Plant Coating                  | Due to its close proximty to the bay, the metal package-plants require marine coatings every 7-10 years.   |
| Influent Well Access Cover Replacement | This project consists of replacing the current access covers with fixed, mounted, flush-to-the-ground, traffic-rated, as there is limited space at the Paradise Cove Plant.  |
| Blower Replacement                     | The current blowers were installed as part of the 2009 start-up of the upgraded plant. They have a useful life of 7-15 years. SD5 must begin to replace them soon.   |
| Plant Grating Replacement              | This project will consist of replacing the current grating with non-rusting fiberglass grating.  |
| Grit Removal Project                   | This project will consist of evaluating the Paradise Cove Plant for possible grit removal systems in order to prolong the life of the pumps.   |
| UV Disinfection                        | Possible installation of UV disinfection, which would eliminate the transportation of chemicals to the Paradise Cove plant. Will need a feasbility study. Language included in current permit for future installation date, if feasible. |
| Undesignated Capital Projects          | These funds will be used for unforseen projects.   |

#### 1. Introduction, History and Overview

Sanitary District No.5 of Marin County was formed in 1922 primarily as a refuse district. In the 1960's a primary treatment plant was constructed at its current location at 2001 Paradise Drive. In the 1980's the District added on a secondary treatment portion to the plant to comply with new local and federal standards of the 1972 Clean Water Act. During that period state and federal grant funding was available for those upgrades which the District took advantage of. Also during the 1980's upgrade the Main Plant treatment facility was designed with a new commonly shared out fall into the SF Bay. The District shares an outfall with SASM (Sewerage Agency of Southern Marin) The District is also responsible for dechlorinating SASM's effluent prior to discharge into the receiving waters of the state of California. In the mid 1980's, a smaller, secondary treatment package plant was constructed on the eastern side of the Tiburon peninsula to serve the unincorporated area of Tiburon, known as the Paradise Cove plant. The District was able to get about 30+ years out of both plants before they were due for major upgrades and were upgraded to improve efficiencies and reliability.

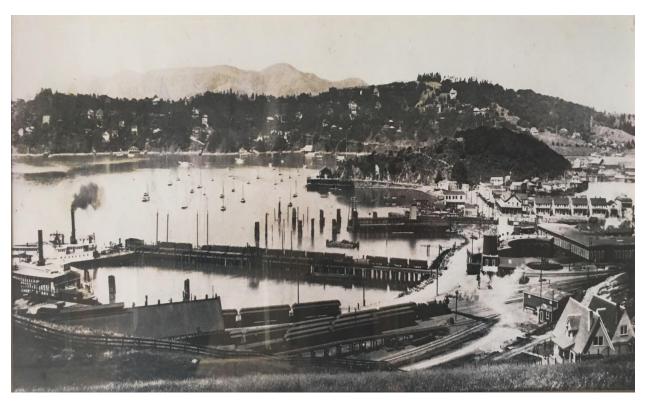

In 2005 the City of Belvedere sewage collection system was annexed to the District. When this task was completed, a new sewer rate had to be established for the City of Belvedere residents, as it was treated as a separate zone per the annexation agreement with Belvedere. In that annexation agreement, the City of Belvedere negotiated keeping the sewer service revenue portion of the property tax, thus the higher rates in the City of Belvedere currently. As of 2018 the Belvedere zone sewer service fee charge is \$1985 per EDU compared to \$1034 per EDU in the Tiburon zone. Prior to annexation into Sanitary District No.5 of Marin County, an investigation of the entire sewer collection was performed by Harris & Associates to assist the District in determining the condition of the collection system and the required repairs that would be needed in the future. A similar study was also performed for the collection system owned by the District for the Tiburon zone. Those studies assisted in determining the rates that are in place today.

In 2009, the smaller Paradise Cove plant was upgraded and enlarged to accommodate a growing population on the eastern Tiburon peninsula. Treatment plant capacity went from 20,000 gallons per day up to 40,000 gallons per day, with a peak flow max of 100,000 gallons per day. In conjunction with the treatment plant upgrades, the Seafirth Estates subdivision constructed 2 pump stations to serve the residents in that area, in order for them (Seafirth Estates) to cease operation of the Seafirth Estates RBC (Rotating Biological Contactor) plant that had reached its useful life. Both pump stations were turned over to the District for ownership and operation after a year of successful operation. In 2018 the District worked with San Francisco State Romberg Center in successfully negotiating an outside sewer service agreement which allowed the university to decommission several septic tanks serving the property and allowed for the construction of a new pump station that the university owns and operates to pump into the Districts publicly available sewer system located on Paradise Drive (Vogt Extension Line). SFSU Romberg began service on January 1, 2019.

In 2014 the District invested \$12 million dollars to upgrade and enhance the Main Treatment plant, which serves the City of Belvedere and the residents eastward of Gilmartin Drive in the Town of Tiburon. The electrical system of the plant was upgraded with a more reliable up-to-date system, major treatment plant equipment was replaced with newer, more energy-efficient equipment, and additional wet weather storage was configured into the project using the existing facilities.

The District has a total of 24 pump stations in its service area and 153,120 lateral feet (29 miles) of gravity sewer lines that range in size from 6" to 24" and a total of 26,400 lateral feet (5 miles) of pressure force main. The District is governed by a 5-member Board of Directors, while the day- to-day management is the responsibility of the District Manager, and his or her staff of 9 employees. Many Districts have different priorities, goals and challenges that face them day-to-day and in the future. That is why this District seeks to layout its priorities, address its concerns and prioritize its future challenges with the creation of this strategic plan. This planning would also assist future Board Members and District Managers with staying on-course in

providing the best, safest, and most reliable collection conveyance and treatment of sewage for the Tiburon/Belvedere peninsula residents. The strategic plan shall reflect the direction, insight, and expertise of the Board Members and its District Staff and shall provide for the overall strategic direction of the District.

1920's era - Tiburon Peninsula- Location of future Waste Water Treatment Plant

1960's era- Tiburon Peninsula – Wastewater Treatment Plant in service- Primary Treatment only

1980's era- Tiburon Peninsula- Secondary Treatment additions to Wastewater Treatment Plant

1980's era Unincorporated East Tiburon -Paradise Cove Wastewater Treatment Plant

2010 Unincorporated East Tiburon- Upgraded Paradise Cove Wastewater Treatment Plant

#### 2. Mission Statement and Values

#### Mission Statement

Sanitary District No.5 of Marin County is a special district dedicated to the protection of public health and the environment through effective and economical collection, conveyance, treatment and disposal of wastewater that meets or exceeds all local, state, and federal regulations.

#### SD5 Values

Sanitary District No.5 of Marin County Board Members and Staff operate under a set of core values in respect to all District Functions. That set of values include:

- Public Health & Sanitation
- Excellent Customer Service
- Fiscal Responsibility
- Public Transparency
- Work Place Safety
- Effective/Reliable Long Term Capital, Operation, Maintenance, Fiscal Planning
- Valued Work Force
- Effective Communication and Decision Making
- Environmental Stewardship

#### 3. Accomplishments

#### **SD5** Accomplishments

A generalized list of recent accomplishments:

#### Main Treatment Plant:

- Invested \$12 Million dollars and rehabilitated the Main Treatment Plant: this was a 2-year project, which improved treatment plant efficiencies and reliability
- Updated the Sewer Use Ordinance to include sewer lateral inspection and repair mechanism to reduce I&I from the collection system
- Began pump station controls replacement program: 11 of 22 pump stations now have new standardized control panels –Panels have been raised per sea level report study
- 15,500 Linear feet of pipe have been replaced/rehabilitated since 2006
- Completed the Point Tiburon Sewer Line acquisition (a 30+yr dispute/unresolved item)
- Completed the Mar West Phase 1 and Phase 2 Pump Station Upgrade \$1.5 Million Invested to this site.
- Completed a LED lighting upgrade as part of our continued efforts to conserve energy & keep costs down

#### Paradise Cove Plant:

- Acceptance of the Seafirth Estates subdivision pump stations: allowed for the decommissioning of Seafirth Estates' Rotating Biological Contactor (RBC) treatment plant
- Acceptance of the Paradise Drive Sewer Line Extension (PDSLE) Line Sewer line: allowed sewer service
  connections for 52 homes allowing people to decommission septic systems in the unincorporated area of
  Tiburon an connecting to the public sewer
- Acceptance of Vogt sewer line extension at Paradise Cove which will allow for an additional 12 connections and the connection of the Romberg Tiburon Center
- Established an Outside Sewer Service Agreement with SFSU Romberg Center for Sewer Service
- Paradise Cove Treatment Plant upgrade and installation of new discharge pipe and diffuser: treatment plant capacity doubled and treatment efficiency improvement

#### Finance & HR:

- Major work on the District's Finances and Capital Improvement Program in FY2009/2010: this led to difficult decisions to increase sewer rates for the prolonged safety and compliance of both treatment plants and its collection system. Prior to 2005, the sewer rates had not been raised in 20+ years
- Made the difficult decisions to cut benefits for new hires, in part of the 2012 Employee Negotiations: this
  established a lower tier for transferring Classic Members as a result of higher CalPERS pension
  obligations
- Began funding a California Employee Retirement Benefit Trust (CERBT) for Other Post-Employment Benefits (OPEB) in 2011
- Paid off CalPERS side fund and SD5's unfunded accrued liability, through 2017
- Updated the SD5 Connection Fee Schedule
- Created a District wide succession plan
- Created new Financial Policy & Procedure Manual
- Updated the SD5 Reserve Policy and created a new CalPERS Reserve Trust in order to fund future CalPERS' inability to obtain target returns in their investment strategies

#### 4. Current Conditions, Future Challenges & Opportunities

#### **Current Conditions:**

The District overall income is around \$6 million dollars. Total operations and maintenance costs, which includes salary, is averaging around \$3 million dollars (not including CalPERS unfunded liabilities) with about 3% inflation each year. Currently, Capital Expenditures run anywhere between \$1.5 -\$2.5 million dollars yearly including debt service. The Districts net operating/capital income varies between \$500k-\$1 million dollars each year. That is the current overall trend of the District finances as of 2017. Please note that both treatment plants recently were improved so the need for costly capital expenditures at both of these facilities will mostly likely not occur for another 4-9 years.

The current National Pollutant Discharge Elimination System (NPDES) permits, for both facilities, have been in compliance year-in and year-out with our current standard of treatment and configuration of both facilities. Labor, Electricity, and Chemicals are the costliest items for operating and maintaining both facilities. The District has done everything possible to reduce those costs, such as installing automated Supervisory Control and Data Acquisition (SCADA) software for improved reliability and to keep labor costs down, installing new energy-efficient equipment (blowers) & completing a LED lighting upgrade throughout the plant to reduce PG&E costs; and performing annual competitive bidding on chemical purchasing contracts to ensure we get the lowest price from the most competitive suppliers.

In 2013, CalPERS enacted new retirement formulas for new-hire employees into the CalPERS' retirement system (Public Employees' Pension Reform Act - PEPRA), which keeps our employee overhead costs down. Currently the District has 5 employees under the Classic Member formula of 2.7% @ 55 formula, and 4 employees under the PEPRA formula of 2.0% @ 62. The District has paid its CalPERS pension liabilities up through fiscal year 2016. The Districts OPEB Other Post-Employment Benefits (retiree health) is around 40% funded as of 2017. The District currently has 6 retirees receiving OPEB. The Board of Directors receive compensation of \$100 for attendance at each Board Meeting; no other benefits are granted to the Board of Directors.

Capital Improvement wise, the Districts main function is to provide high quality collection, conveyance, treatment and disposal of the wastewater in this service area. A main priority currently for the District is the rehabilitation of the districts collection system – an ongoing 10 year Capital Improvement Program (CIP) is in place to replace/rehabilitate the collection system based on video reports conducted in 2006 and 2011. Also, the District is currently under way with a project standardizing the control panels at the 24 pump stations, servicing the areas and raising them per the Marin BayWAVE Marin Bay Waterfront Adaptation Vulnerability Evaluation

The District when feasible participates in regional programs/partnerships for the benefit of rate payers and the overall enhancement of services in Marin. Some examples include, mutual aid services agreements which allows the District to call on other sewer agencies that participate in the group for assistance with equipment/staffing in times of need, the Marin County Public Education Group, which collaborates with other agencies in the Districts efforts to inform the rate payers and the general public about pollution prevention, and monthly general manager meetings with the managers of the 5 other Treatment plant agencies in Marin to share ideas and assist one another on critical issues facing the agency or the wastewater community.

#### Future Challenges and Opportunities:

The District has several challenges in the near and far future. Some of those items include:

#### Wastewater Treatment System:

- Possible Nutrient limits in National Pollutant Discharge Elimination System (NPDES) permits requiring expensive upgrades to facilities
- Possible Toxicity Limits in NPDES permit- requiring expensive upgrades to facilities
- More stringent requirements from the Bay Area Air Quality Management District (BAAQMD) -New Sources-Emergency Generators and Portable Pumps must comply with new standards
- Increased electrical costs due to provider raising rates
- Treatment Plant Upgrades in 2040
- Opportunities to enhance collaboration with neighboring agencies on larger items like laboratory service and safety training services

#### Customer Service:

- Improved web site for ease of customer use
- Development of quarterly newsletter -increased awareness of district activities and accomplishments for customers- for website
- Additional Staff time for permits and Inspections as identified in the recently approved succession plan
- Additional Ark Newspaper Articles

#### HR and Employee Development:

- Encourage staff to cross train in Operations and Maintenance
- Enhance SR WWTP Maintenance/Collection System Tech Position to a Supervisor to assist in the day to day organization of maintenance and long range planning and responsibility in keeping up to date records-responsible for WDR's (waste discharge requirements) for Main Plant and Paradise Cove (LRO Legally Responsible Official Requirement)-as identified in the recently approved succession plan
- Enhance SR WWTP Operator Position to a Supervisor position to assist in the day-to-day organization of operations and long range planning (Chief Plant Operator) responsible for Main Plant and Paradise Cove permits (designated operator in charge)- as identified in the recently approved succession plan

#### Renewable Energies and Continued Energy Reduction:

- Investigate all possible paths to energy savings
- Investigate pumping plan development for pumping during off hours and or reducing the start & stops

#### Organization, Budget and Finance:

- Sewer Rate Sustainability
- CalPERS Pension Sustainability
- Other Post Employee Benefits (OPEB) Sustainability
- Complete scanning project
- Clean up and organize current District administrative database
- Create standards and file storage location, and file storage paths for staff to save work that all staff need access to

#### Organization, Budget and Finance (Cont'd):

- Connection Fee Rates
- Contracted Services
- Sewer Rate Study- Last sewer rate survey completed in 2010

#### Facilities and Operations:

- Rebuild the maintenance shop and create 2<sup>nd</sup> floor for an overall operations/maintenance building.
- Review of Emergency Planning/Preparedness: Boat access to treatment plant sites, and Vactor truck availability, and bypass pumping review
- Planning for future Treatment Plant Rehabilitation or Relocation Options
- Office Upgrades Limited Space
- Complete a Collection System Master Plan in conjunction with Sewer Rate Study- Last full scale sewer system evaluation completed in 2006

#### 5. SD5 Goals

The SD5 Strategic Plan is organized according to six major goals which assumes Financial Stability as the overall goal:

➤ Goal One: Protecting Public Health and Employee Safety

Goal Two: Infrastructure Reliability
 Goal Three: Fiscal Accountability
 Goal Four: Operational Capability

> Goal Five: Employee Development

➤ Goal Six: Resource Recovery/Energy Sustainability

The Goal areas represent Board members overall top priorities. Within each Goal area, Board Members identified their top priorities and programs which are summarized on the following pages.

#### Goal One: Protecting Public Health and Employee Safety.

The Districts main purpose for existing is for the sole purpose of protecting public health through safe and efficient collection, conveyance, treatment, and disposal of wastewater generated in the Districts service area, and to ensure a safe working environment for all staff.

The SD5 Board established the following key objectives:

- Maintain Adequate Staffing and Training of Staff
- Strive to eliminate all SSO's
- Compliance with National Pollutant Discharge Elimination System (NPDES) and Bay Area Air Quality Management Board (BAAQMD) permit requirements
- Maintain Robust safety
- Proactive with our Maintenance Activities

#### **Goal Two: Infrastructure Reliability**

In order to protect public health, the Districts infrastructure reliability goes a long way in achieving that primary purpose. Good, sound planning and management of the District's facilities must be in order, while preventive maintenance must also be a top priority.

The SD5 Board established the following key objectives:

- Maintain and evaluate the on-going 10-year Capital Improvement Plan annually
- Maintain a comprehensive CMMS system for tracking and forecasting of future Capital work and to maintain current equipment in service
- Clean 25% of SD5's sewer line each year
- Develop Emergency Plan for abandoned emergency outfall line at the Main Plant
- Review Emergency Plan for plant-access during non-access situations (road closures, etc.)

#### **Goal Three: Fiscal Accountability**

To maintain a well-operating and functional District, we must be conscious of its financial obligations, by budgeting accurately and managing the operations of the District fittingly in order to maintain financial stability.

The SD5 Board established the following key objectives:

- Ensure sewer rates are adequate for operation of the District
- Review CalPERS unfunded liabilities annually
- Ensure Achievable CIP Plan is in-line with current level of funding
- Review Sewer Rates (2020-2021)
- Ensure Adequate Sewer Reserves in-line with Reserve Policy
- Review California Employee Retirement Benefit Trust (CERBT) Trust Funding
- Evaluate & Apply for Grant Funding when applicable
- Review MOU obligations regarding Classic and PEPRA and keeping pensions costs down

#### **Goal Four: Operational Capability**

Evaluation of operational strategies to ensure satisfactory collection, conveyance and treatment for possible reductions in operational costs.

The SD5 Board established the following key objectives:

- National Pollutant Discharge Elimination System (NPDES), Occupational Safety and Health Administration (OSHA), and Bay Area Air Quality Management District (BAAQMD) Compliance
- Reduce Inflow and Infiltration (I&I)
- Reclaim Water Program Review for use in sewer cleaning activities
- Maintain good partnership with Sanitary Agency of Southern Marin SASM
- Continue Collaboration, with MASS Group Marin Association of Sanitary Sewers group
- Evaluate Grit Removal System at Paradise Cove Plant
- Review I.T. Information Technology Strategic Plan

#### **Goal Five: Employee Development**

A well trained and hard-working staff leads to operational success, and a safe and fun work environment. In order to maintain that type of culture and work space, employee development plays a key role.

The SD5 Board established the following key objectives:

- Create new WWTP Operations Superintendent Position
- Create new WWTP Maintenance & Collection System Superintendent Position
- Create new Permit/Administration Assistant Position
- Maintain Adequate Staffing levels
- Continue Cross training activities
- Review Staff Bi-annual Performance Evaluations
- Maintain and update succession plan as necessary

#### **Goal Six: Resource Recovery and Energy Reduction**

With the operation of two wastewater treatment plants, the District collects, treats, and disposes tons of organic matter each year. That organic matter, which is eliminated during the treatment process, requires a lot of energy to remove it. It also generates energy in the form of methane gas, during the treatment process, which is currently used for heating purposes. Other forms of re-use exist and should be explored. The disposal of biosolids is becoming increasingly difficult with new regulations and the restrictions of landfills. A comprehensive plan for disposal should be a key objective.

The SD5 Board established the following key objectives:

- Develop Bio-Solids Master Plan
- Develop Energy Saving Master Plan
- Seek Economical Go Green options/projects

# 6. Strategic Plan Review and Monitoring

Board members and staff agree that the strategic plan should be reviewed annually, in conjunction with the budget, making review process. Annual reports shall be prepared by SD5 staff for presentation to the Board Members in order to explore top priorities in more depth, as needed or requested by the Board.
